

# Chris Hatton

I am a dedicated, self-motivated and highly proficient programmer with over 15 years professional software development experience. Complex and interesting challenges are a real driving force in my life and I enjoy continually learning new skills both at work and in my free time.

## EXPERIENCE

I suppose I am what is regarded as a “Specialised Generalist”. This means I have a wide set of skills and experience that can adapt to most problem domains. I’ve worked on many projects from multi-million dollar investment platforms to small web applications for a few thousand pounds. My primary aim with any project is to use my experience to create software of the highest quality; on time; on budget and that is both extensible and secure.

### **Koodle Software, Blantyre— Senior Developer / Owner**

Present

As a developer and small business owner every job falls under my remit. I undertake sales and marketing, finance, research as well as working on the full lifecycle of small software projects including deployment and hosting on my own servers, AWS, and other third-party providers..

I’ve also been working on a larger enterprise recruitment CRM/ATS (Customer Relationship Management/Applicant Tracking System) for a number of years that forms the basis of this business.

### **Netifi Ltd, East Kilbride— Senior Developer / Director**

2018 - 2020

Between myself and my business partner we provided a number of medium sized businesses with all of their communications, network, hardware and software requirements.

I worked on two main projects in this time that formed the basis of our client’s day-to-day operations. One was a high volume temporary recruitment system and the other was a work management system for an engineering and maintenance company.

### **JP Morgan Chase & Co, Glasgow—Senior Developer**

2014 - 2018

My team provided a platform for constructing fee structures and calculation of fees for private bank clients. We also provided another platform for mass portfolio rebalancing.

## SKILLS

- Analysis and Design
- Web Development
- Desktop Development
- Mobile Development
- Database Development
- Agile Planning
- Software Security

## LANGUAGES

- Java
- PHP
- JavaScript
- HTML, CSS, etc...
- Dart

## PERSONAL INTERESTS

**Food Photography** find me on Instagram @chris.cooks.it

**IOT Development** using AVR and ESP8266 wifi chips for home automation

**Plumbing and Heating** repairs on my old Gledhill Systemate 2000 thermal store

**Community Litter Picking** and managing a litter picking group and my own litter picking application (littermap.co.uk)

My primary role in the team was to develop and maintain a UI using ExtJS. I was regarded as the team's subject matter expert with regards to UI and UX development. I have also played a significant part in the development of supporting application services and testing.

As a senior developer I have also been fortunate enough to be involved in recruitment, technical leadership and education within the team.

I have undertaken many courses which include but are not limited to financial product awareness, portfolio management, software security, and agile software development with Scrum.

### **SEEMiS Group LLP, Hamilton— *Developer / Analyst***

2007 - 2014

The SEEMiS Group LLP provided MIS (Managements Information Systems) to Scottish education departments, schools, nurseries, and related educational bodies.

My principle role was to develop solutions to a wide range of problems whilst ensuring relevant time-scales, budgets, and quality standards required were met. I also provided third-line software support for a large number of existing applications.

I was fortunate enough to gain full life-cycle/full stack development experience, and as part of a small agile team learned how to help promote adaptive planning, evolutionary development and delivery of products to customers.

## **EDUCATION**

### **Sun Microsystems, Inc.**

2009
